

MATTAWAN ROCKET CLUB

Hello,

My name is Vincent Dexter and I am a Junior at Mattawan High School. I am contacting you because you're an important part of our community. You no doubt understand the pressing need for innovative growth in science, technology, engineering, and math (STEM) education opportunities for local students.

Our school is competing in The American Rocketry Challenge (TARC) and could use your support! The American Rocketry Challenge is the world's largest student rocket contest. This year, nearly 5,000 students from across the country are competing for the chance to make the National Finals in Washington, D.C. Our team must design, build, and launch a rocket carrying one raw egg 850 feet into the air, and return to earth with the egg un-cracked, all within 42 to 45 seconds. But becoming national champions in rocketry doesn't happen overnight – that's why we need your help.

The Mattawan Rocket Team is a group of high schoolers from Mattawan, Michigan with plans to enter engineering, aerospace and science fields. We're all excited about working on this rigorous project that requires an understanding of physics, chemistry and engineering to win this challenge. We would be grateful if you were able to contribute and help our team reach the top!

This is our first year competing in the Rocketry Challenge, and your financial or material donation can help us succeed. Our fundraising goal of \$15,000 includes not only our team costs, but also creating a middle school level rocket team and bringing hands-on science projects to classrooms.

Please join other local businesses and help out by sponsoring. This can be done by completing the enclosed form or online at www.launchmattawan.org. All contributions are tax-deductible and we'll send you back a receipt from our 501(c)(3).

If you have questions, please contact our Team Captain Vincent Dexter at vdexter194@mattawanschools.org or call him at (269) 716-5253 after 3pm.

Thank you very much for your support,

Vincent Dexter
Mattawan Rocket Team Captain
